The survey uses a 5-point Likert scale on the level of agreement of students on each indicator. Student's responses from the survey will range from **(5) Strongly Disagree, (4) Disagree, (3) Neutral, (2) Agree, (1) Strongly Agree.**

FUNCTIONALITY

Question	5	4	3	2	1
1. The system allows the user to login and signup.					
2. The system allows the user to submit feedbacks easily.					
3. The system allows multiple users to access the open-access database simultaneously without any restrictions.					
4. The system provides an interactive forum that enables discussion and knowledge sharing among users.					
5. The system provides and view variety of e-resources.					

RELIABILITY

Question	5	4	3	2	1
1. The system ensure that the data displayed in the interactive forum is accurate and up-to-date.					
2. The system reliably save and retrieve your login records without errors.					
3. The system ensures the discussion threads in the interactive forum is accessible and is consistently updated without issues.					
4. The feedback feature consistently available whenever you need to use it.					
5. The system is reliable overall in meeting your needs for accessing, sharing, and submitting information.					

SECURITY

Question	5	4	3	2	1
1. The system ensures that only authorized users can access the BASC E-Library platform.					
2. The system allows users to securely log in with unique credentials.					
3. The system provides a mechanism to reset user passwords securely.					
4. The system protects user feedback submissions from being exposed to unauthorized users.					
5. The system ensures that user usage statistics are anonymized to maintain privacy.					

PERFORMANCE

Question	5	4	3	2	1
1. The system provides an intuitive interface for users to submit feedback on their experience with the BASC E-Library platform					
2. The system's reliability in terms of uptime and availability is reliable.					
3. The system experience crashes, errors, or unexpected behavior.					
4. The system handles increased user load and data volume.					
5. The system operates reliably, with minimal errors or issues encountered during use.					

COMPATIBILITY

Question	5	4	3	2	1
1. The system works on different devices (e.g., desktop, laptop, tablet, smartphone).					
2. The system work with different web browsers (e.g., Chrome, Firefox, Edge)					
3. The system work with different operating systems (e.g., Windows, macOS, Linux)					
4. The system provides a responsive design that adapts well to different screen sizes and orientations.					
5. The system integrates smoothly with open access databases when accessed on different devices and browsers.					

Thank you for your responses to this survey. Rest assured that all your responses will be treated with the utmost discretion. We are so grateful for your answers! This will guide us in creating a better experience for you.
