

IT 213 – LABORATORY ACTIVITY 8

Name: Gonzales, Andrei Francezca R.

Score: _____

Course & Section: BSIT 4B

Date: October 17, 2024

Basic input and Output using Powershell and Creating an Account Using Powershell

Instruction: While completing the following tasks, please provide screenshots for each step. Avoid recording videos. Submit your completed work with your names and the screenshots attached in pdf format, following the file name of SurnameFirstName_IT213_Laboratory8.pdf, example: MacalinaoDave_IT313_Laboratory8.

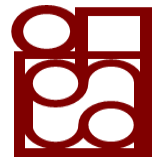

(Display the code and the output)

1. Write a PowerShell script that prompts the user for their first name, last name, and password. After inputting the information, display the entered values using the variable names. Include a screenshot of the script and its output, using your own first and last name for demonstration.

```
1 #Import Required Module
2 Import-Module ActiveDirectory
3
4 while($exit -ne "x"){
5
6     #Adding a user account
7     $firstName = Read-Host -Prompt "Please enter first name"
8     $lastName = Read-Host -Prompt "Please enter last name"
9     $password = Read-Host -Prompt "Please enter a password"
10
11     $securedPassword = ConvertTo-SecureString $password -AsPlainText -Force
12     $OUPath = "OU=4B,OU=Fourth Year,OU=BSIT,OU=BASC,DC=iamit,DC=com"
13
14     New-ADUser -Name "$firstName $lastName" -GivenName $firstName -Surname $lastName -UserPrincipalName "$firstName.$lastName" -Path $OUPath -AccountPassword $securedPass
15     $exit = Read-Host -Prompt "Press x to exit"
16
17     echo "This user's name is $firstName $lastName. The account password is $password"
18 }
```

PS C:\Users\Administrator> C:\Users\Administrator\Desktop\loop.ps1
Please enter first name: Andrei
Please enter last name: Gonzales
Please enter a password: P@\$\$w0rd!
Press x to exit: x
This user's name is Andrei Gonzales. The account password is P@\$\$w0rd!
PS C:\Users\Administrator>

2. Within the BASC Organizational Unit (OU), create three sub-OUs: BSIT, BSGE, and BSFT. Under the BSIT OU, establish four sub-OUs named First Year, Second Year, Third Year, and Fourth Year. Finally, within the Fourth Year OU, create three sub-OUs labeled 4A, 4B, and 4C.

IT 213 – LABORATORY ACTIVITY 8

3. Write a PowerShell script to create a new user account. Set the default password to your surname followed by your favorite number (e.g., "Macalinao5"). Store the accounts that will be created in OU that are based on your section.

```
1 #Import Required Module
2 Import-Module ActiveDirectory
3
4 #Adding a user account
5 $firstName = Read-Host -Prompt "Please enter first name"
6 $lastName = Read-Host -Prompt "Please enter last name"
7 $password = "Gonzales"
8
9 $SecuredPassword = ConvertTo-SecureString $password -AsPlainText -Force
10 $OUPath = "OU=4B,OU=Fourth Year,OU=BSIT,OU=BASC,DC=iamit,DC=com"
11
12 New-ADUser -Name "$firstName $lastName" -GivenName $firstName -Surname $lastName -UserPrincipalName "$firstName.$lastName" -Path $OUPath -AccountPassword $SecuredPassword -ChangePasswordAtLogon $True -Enabled $True
13
14 echo "This user's name is $firstName $lastName. The account password is $password"
```

PS C:\Users\Administrator> C:\Users\Administrator\Desktop\lab8.ps1
Please enter first name: Andrei
Please enter last name: Gonzales
This user's name is Andrei Gonzales. The account password is Gonzales1
PS C:\Users\Administrator>

4. Write a PowerShell script that uses a while loop to continuously prompt the user for their first and last name. Create a new user account for each entry. The default password should be set to your surname followed by your favorite number. Allow the user to exit the loop by pressing the "x" key.
